Planting for the Future

Planting trees to restore and strengthen our landscapes

<https://www.sazimebudoucnost.cz/>

<https://www.funduszpartnerstwa.pl/planting-our-future/>

Initiative Goals

Enhance Resilience

Supporting landscape resilience through community tree planting.

Plant 10 Million Trees

One tree for each Czech citizen, with proper care ensured.

Create a Movement

Unite citizens and institutions to transform landscapes and cities.

Why Support Tree Plantings

Ecological Benefits

Trees prevent erosion, slow rainfall runoff, and cool surroundings through evaporation.

Biodiversity

Trees increase species diversity and enable the return of small animals to agricultural land.

Natural Air Conditioning – Climate Adaptation

Trees are the most cost-effective cooling solution for the overheating Czech Republic.

Investment in Our Future

80 EUR

Cost Per Tree

Mature tree saplings for landscape planting are significant investments.

2000 EUR

Tree aftercare expenses

Each tree represents a substantial financial commitment.

10 years

Care Period

Long-term maintenance ensures tree survival survival and health.

Achievements of the initiative

4,8M

trees

registered on the Planting for the
Future map

130K

volunteers

engaged in the initiative
since 2019

100+

projects

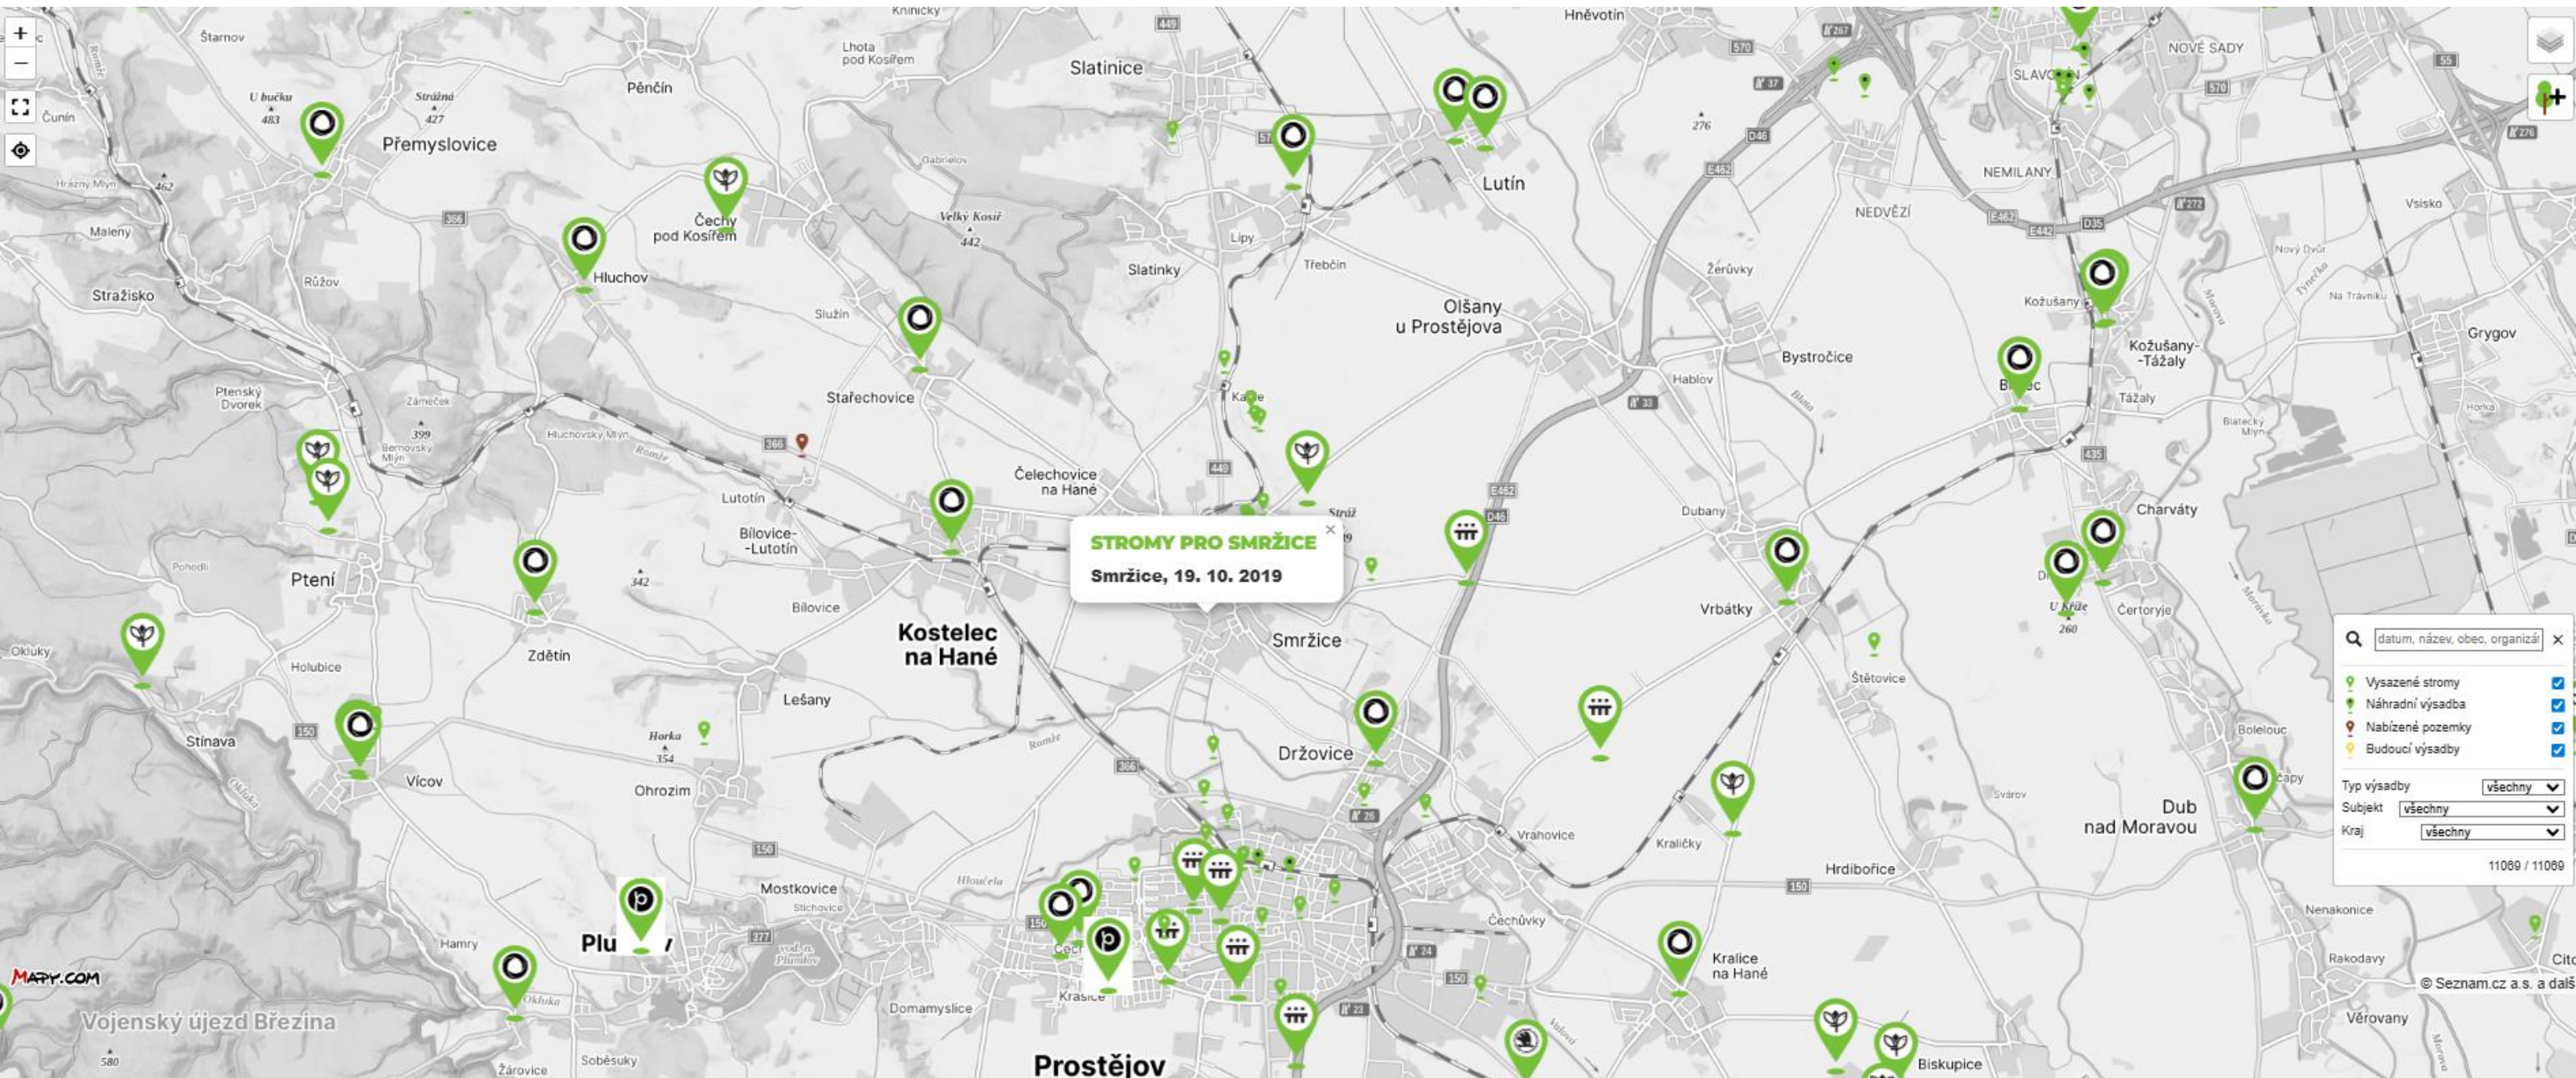

supported every year

7

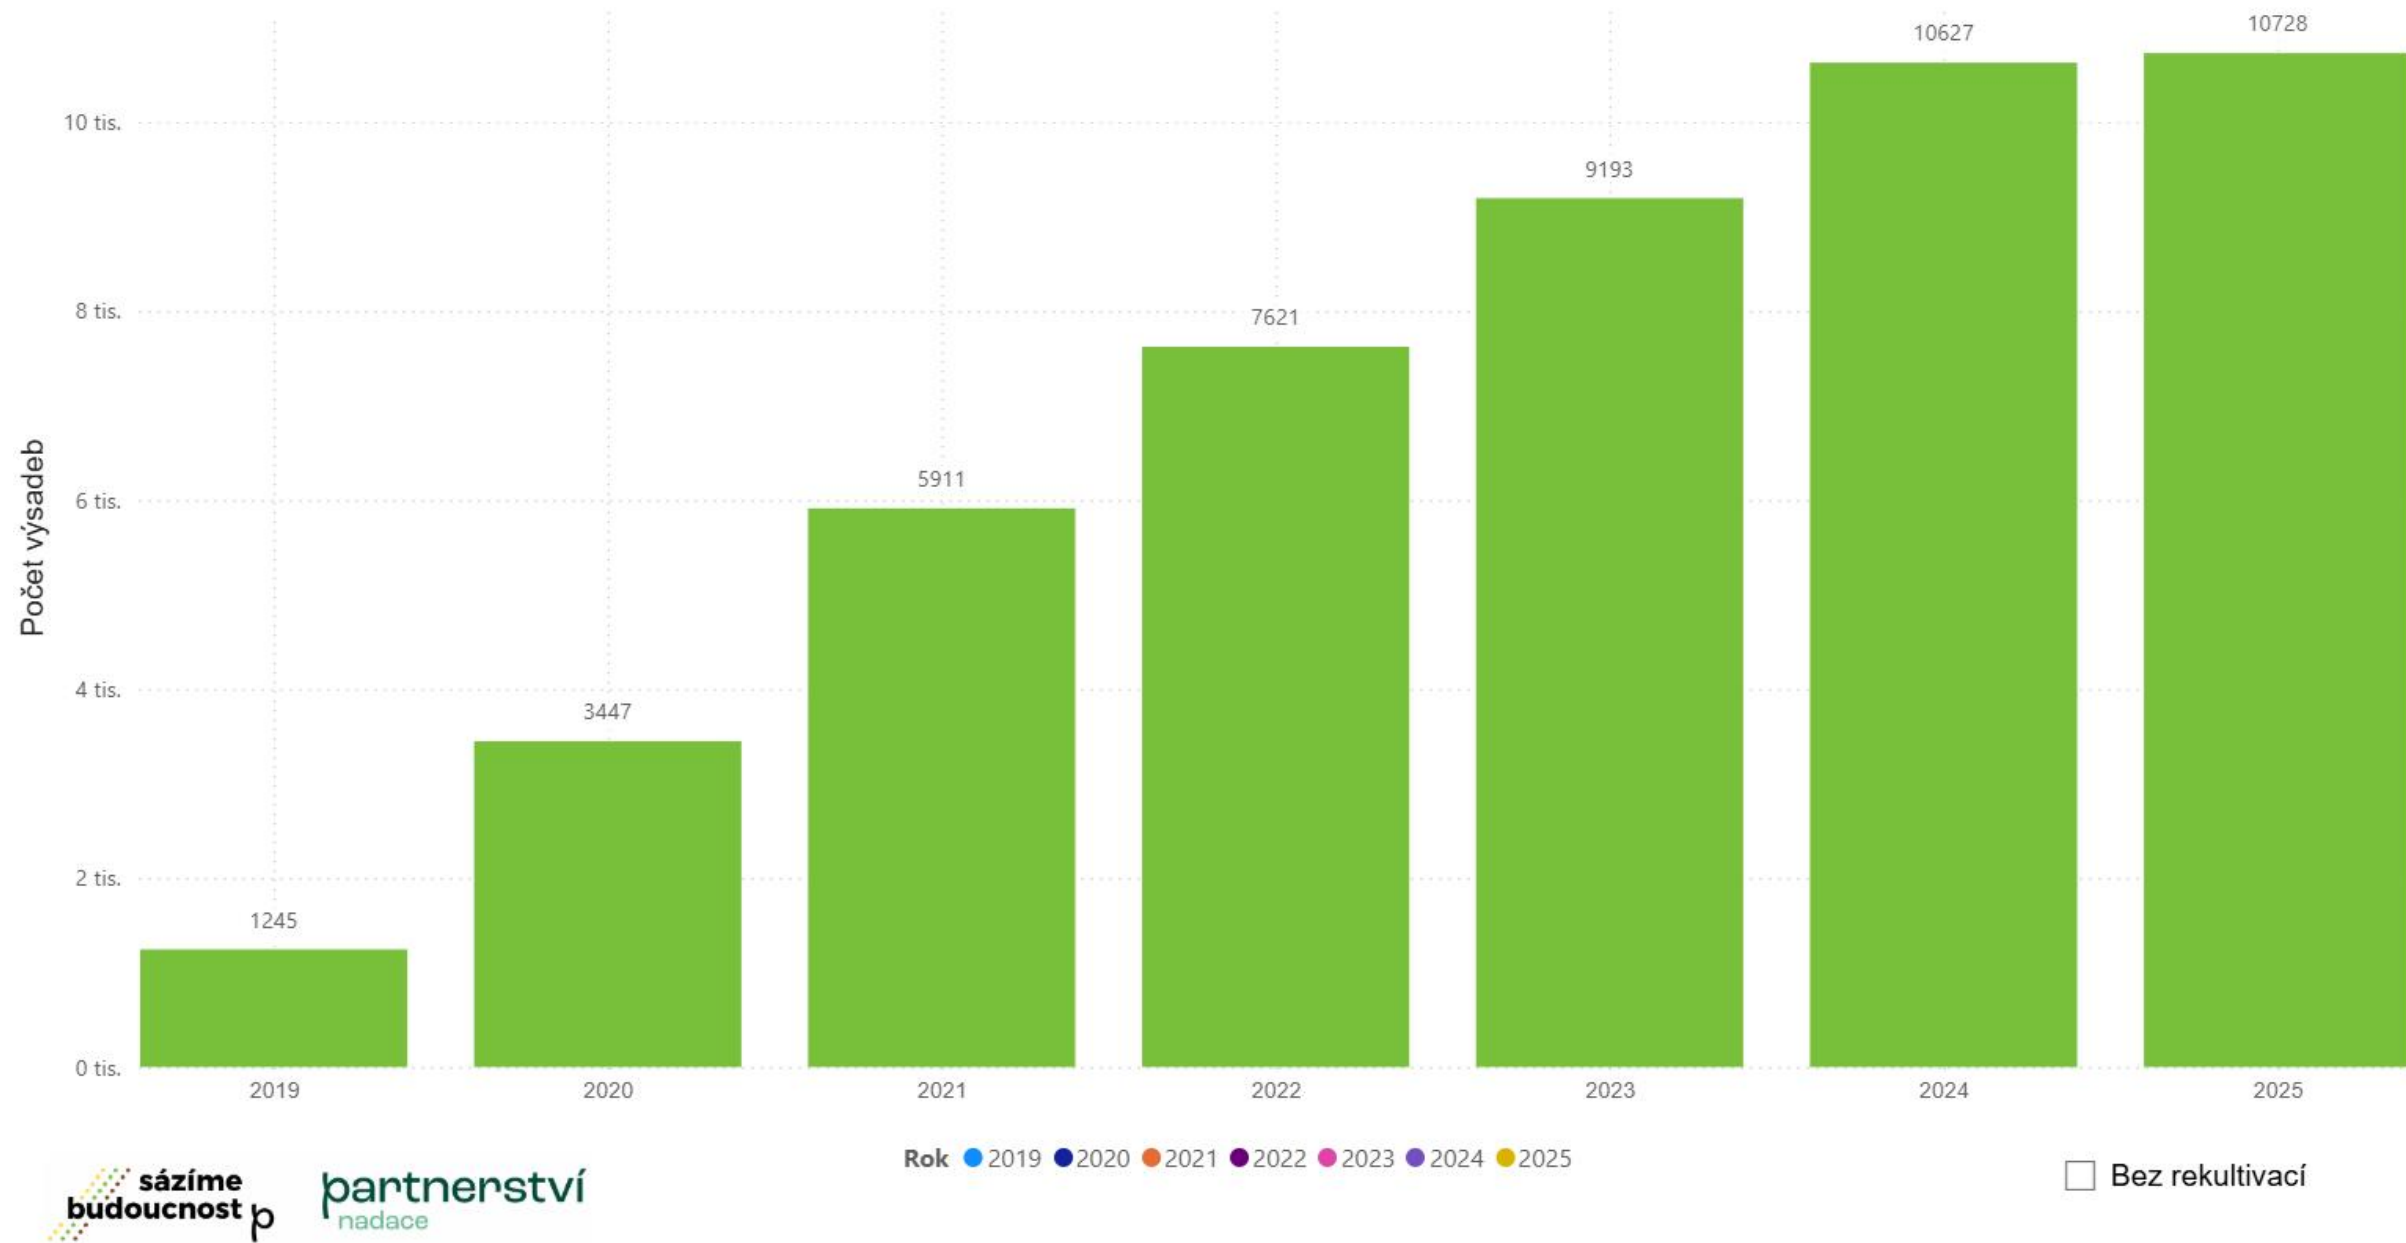

Avenues of Freedom

planted to commemorate the
anniversary of November 17

What makes us different

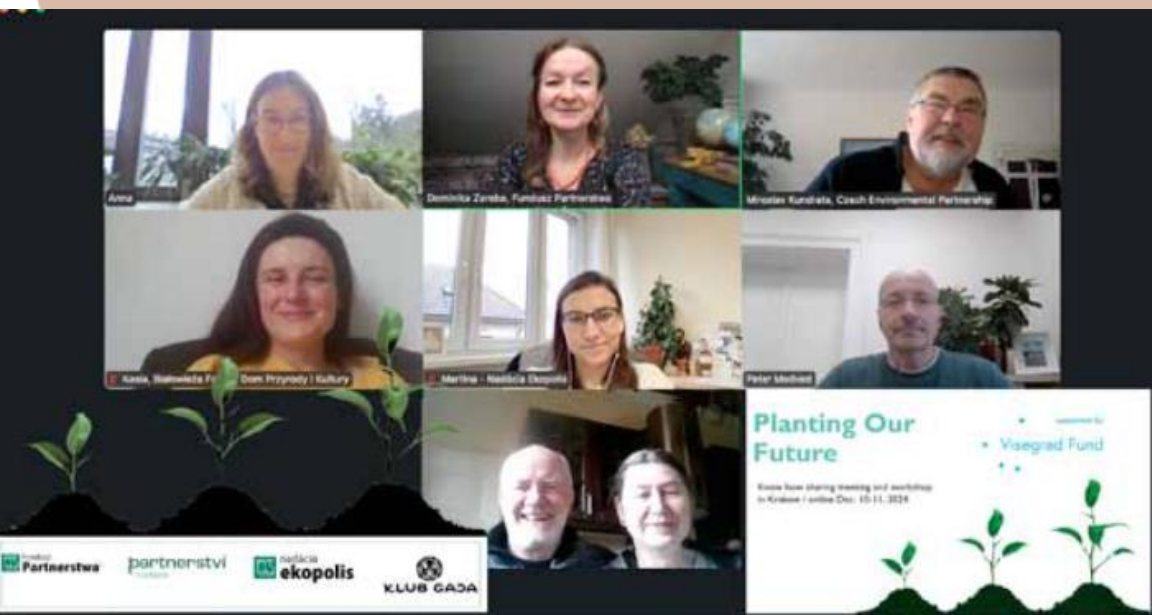

Planting for the Future in Central Europe

Organizational model of the initiative

1. Planting Our Future initiative at the Central European level is a network of country programs, having linkages to the broader European level, based on common principles.
2. Country programs collaborate with each other through sharing know-how, good practices (case studies), occasional joint/cross-border planting events and communication.
3. Each country program - in an ideal scenario - is based on 4 pillars/components:
 - ▶ **COORDINATION** – nurturing the collective collaboration of partners/stakeholders, working with donors and institutional partners.
 - ▶ **SMALL GRANTS SCHEME** – providing grants for planting events and tree care to the local communities.
 - ▶ **EDUCATION, EXPERTISE & INNOVATION** component – ensuring the expertise on tree care/climate/biodiversity, incorporating educational activities and tools to the planting events, introducing innovative approaches within the whole process of program implementation.
 - ▶ **PROMOTION & COMMUNICATION** – working with media, social media, the Ambassadors of the initiative, communication campaigns. The component also includes the necessity to have a platform enabling registration of tree plantings.
